

The Amazing migration of Osprey 30(05)

Introduction

Ospreys at Rutland Water are known by their ring numbers. Osprey 30 (Its blue leg tag number) hatched in 2005, where the (05) comes from.

Osprey 30 is female and carries a satellite tracker so we always know where she is.

The Rutland Ospreys website has a daily BLOG, and we have provided extracts from the autumn blog which follows her migration from Rutland to West Africa where she spends the winter.

Getting the BLOG

You can download the blog and provide your students with an electronic copy of this resource.

Use of the BLOG

There are many ways you can use this lengthy document in your English lessons.

30's story

Use the information to make a short story about the journey written by Osprey 30.

Stop press

Produce a headline and 100 word summary about 30's amazing journey.

Osprey 30 in verse

Write about Osprey 30 in verse. Choose a type of verse.

E-mail from an Osprey

If 30 could send the Rutland Osprey team an e-mail after her journey, what would she say?
