

Osprey food Chains

Aims / Plan

“Osprey food chains” is intended as part of a larger study of food chains and pyramids. It can be used as a lesson task, revision of the subject or as part of a homework task.

As a lesson starter it could also be used with the osprey food chains key words word search, To accompany the sheet pupils could be shown a film clip of an osprey fishing which is available on the website.

Objectives

1. Learn or reinforce the key words encountered in the food chains topic.
2. If the word search is used as well as the worksheet, pupils are given several opportunities to read and write the key words.
3. Pupils will learn about the place of an osprey in a food chain and how the osprey is adapted to its place in the food chain.

Answers to Questions

1. animals
2. plants
3. omnivores
4. photosynthesis, producers
5. carnivores
6. predators
7. algae minnow trout osprey

Extension

Osprey

Trout
